

Instructions for Internet Explorer

Please read these simple, step-by-step instructions, then click on the **Get The Origo Root Certificate** link below to collect the Origo Root CA certificate onto your PC.

[Get the Origo Root CA – G3 certificates](#)

1. When prompted by the **File Download** window that appears after clicking the **Get The Origo Root Certificate** link above, select the option to **Open this file from its current location**, and click the **OK** button.
2. A different window will then appear, titled **Certificate**. The screenshot below shows the **Certificate** window details for G3 certificates:

3. Click the **Install Certificate...** button at the bottom of the Certificate window. This will initiate the Certificate Import Wizard.

4. Click the **Next** button on the Certificate Import Wizard's Welcome page to continue.

5. When prompted for a Certificate Store for the Origo Root CA, do not select the default 'Automatically select the certificate store' - you must select 'Place all certificates in the following store' and only then click the **Browse...** button.
 - On the Select Certificate Store window, click on **Trusted Root Certification Authorities**, and then click **OK**, then click on **Next**.

6. Click on the **Finish** button on the Completing the Certificate Import Wizard page. You should then see a further window pop up with the message **The import was successful**, and an **OK** button. Click on the **OK** button here to complete the Origo Root CA certificate installation, and then click the **OK** button on the Certificate window to close it down.
